mobile station side transmission part generates the special radio wave signal to be of high power spectrum density by bypassing the spread modulation

Reason for Allowance

1. This action is in response to the amendment and arguments filed 02/19/10.
2. Claims 2, 7, 8 and 11-13 have been amended.
4. Claims 1, 9 and 10 were previously cancelled.
5. Allowable claims 2, 4 and 5 from previous office action filed 08/21/09.

Allowable Subject Matter

6. Claims 2-8 and 11-16 are allowed over prior art.

The following is a statement of reasons for the indication of allowable subject matter:

In the Examiner's opinion, the prior art of recorded either singularly or in proper combination fails to teach a mobile station which communicates with a base station by using a direct sequence system encompassing a special call part configured to request initiation of a special call, a mobile station side transmission part which in response to a request from the special call part, generate a special radio wave signal of high power spectrum density and transmit it to a base station, a spread modulation part to perform spread modulation of an information signal, the mobile station side transmission part generates the special radio wave signal to be of high power spectrum density by bypassing the spread modulation part.

Green (US Patent No. 5926133) and McCorkie et al. (US20030161411) in combination discloses a transponder signal received by base stations at a higher power level which is only used for emergency communications, and utilizing spread modulation

techniques where bypassing demodulation and modulation circuits so that direct audio frequency signals are transmitted.

However, the cited references fail to teach the claimed limitation where the mobile station side transmission part generates the special radio wave signal to be of high power spectrum density by bypassing the spread modulation. Therefore, the prior art of record either singularly or in combination fails to teach the above claimed limitations for claims 3, 6-8 and 11-13 and is therefore reason of allowance. All associated dependent claims are allowed under the same reason set forth above.

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure and listed on form PTO-892.
